Introducing the FLASH ALERT system:

Receive weather closures/delays via text message, email, or push notification plus emergency messages

Parents, parishioners, staff and students wishing to receive Christ the King weather closure/delay announcements via email, text message, or push notification can sign up by going to: http://flashalert.net/id/cks

When you get to that page, start the process by entering your email address and setting a password. Once the account is established, you may add one or two additional email or cell text addresses. Each new entry will require you to launch a test message to that address which will contain a two-letter code which must be entered back onto your account page to ensure that the address(es) is valid, or by clicking the link in the message.

We urge you to download the new, free app for iOS and Android called FlashAlert Messenger. It uses push notification to send messages directly to your phone, bypassing the cell companies' text message channel. Search for FlashAlert Messenger at the iTunes App Store (iOS) or at Google Play (Android).
